PROJECT:

Title: Cashless College Fee Management System with Blockchain-Based Receipt Verification

Description: I developed a Cashless College Fee Payment System to simplify and digitize the fee collection process for educational institutions. The system allows staff to manage student records, process payments securely using Razorpay, and automatically generate downloadable PDF receipts. To ensure transparency and security, I integrated blockchain-based receipt verification using the Bitquery API. The backend is powered by Firebase Firestore for real-time data management, and the frontend is built using HTML, CSS, and JavaScript for a responsive and user-friendly experience.
